

- RLOV - Froehlich

Nr. 27/49

August 6, 1949

Subject: The interrogation of the refugees and deserters from the Soviet Union, who have especially interesting information.

Belvedere VI

- 1. Through agent Bruno I made about 6 months ago acquaintance with certain Sergei Orlov.

- 2. During our frequent discussions Orlov told about the ^{large} ~~big~~ quantities of ~~the~~ soviet refugees and deserters arriving into the USA Zone of Germany, who possess often valuable information and who, in majority of cases, are neither interrogated at all nor are interrogated in a proper and efficient way. The bulk of these individuals, born and grown up in the soviet conditions are very careful and suspicious individuals, and therefore they do not give up the information which ~~they~~ possess during the normal routine interrogation.

- 3. Orlov added that he has connections among the various official and ~~confidential~~ philanthropic institutions handling these refugees and that he is always able to select the most interesting individuals.

- 4. I made then the proposition that he should turn over to me the most interesting individuals for interrogation.

- 5. Orlov accepted, and the following agreement has been concluded with him:

-a/. Orlov would in the future inform me about all the refugees whom could be of interest for us.
